## Caring for Your Animal

### Feeding

You can feed rabbits good, clean hay or oats every day. Do not feed young rabbits cabbage or lettuce (it might give them diarrhea). Also give your rabbits at least ½ cup of feed with at least 16% protein in it each day.

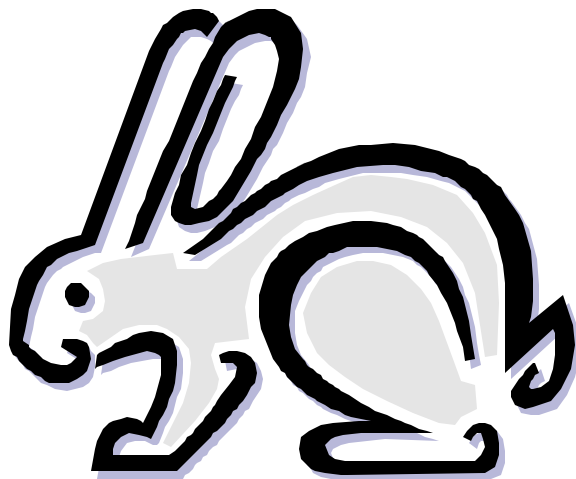

Remember to keep your hutch or cage clean and free of litter. Remember that rabbits like to be fed at the same time each day (just like humans).

### Watering

Provide your rabbits with clean, fresh water every day. Wash the water container at least once a day and disinfect them at least once a week to prevent your rabbits from getting sick.

### Management

Make sure your rabbits have plenty of feed and water and are comfortable. This means you should check your rabbits at least twice a day.
